

PATIENT- AND FAMILY-CENTERED CARE: A HOSPITAL SELF-ASSESSMENT INVENTORY

Patient- and family-centered care is an approach to the planning, delivery, and evaluation of health care that is grounded in mutually beneficial partnerships among patients, families, and health care providers. It is founded on the understanding that the family plays a vital role in ensuring the health and well-being of patients of all ages. In patient- and family-centered care, patients and families define their “family” and determine how they will participate in care and decision-making. The four principles of patient- and family-centered care are:

Dignity and Respect. Health care providers listen to and honor patient and family perspectives and choices. Patient and family knowledge, values, beliefs and cultural backgrounds are incorporated into care planning and decision-making.

Information Sharing. Health care providers communicate and share complete and unbiased information with patients and families in ways that are affirming and useful. Patients and families receive timely, complete, accurate information in order to effectively participate in care and decision-making.

Participation. Patients and families are encouraged and supported in participating in care and decision-making at the level they choose.

Collaboration. Patients, families, and providers collaborate in policy and program development, implementation, and assessment; in health care facility design; and in professional education, as well as in the delivery of care.

This assessment inventory is designed to help hospital and health system administrators and staff think about how a hospital, department, or clinical area operationalizes patient- and family-centered care. It is designed for use with an interdisciplinary team that includes patients and families served by the hospital. The tool will assist those who complete it in determining priorities for change and improvement. Many who have used this inventory have found that even the process of completing the tool has educational value, because it helps inform participants about the core concepts and strategies of patient- and family-centered care.

The assessment inventory is divided into 10 sections:

- Leadership
- Mission and Definition of Quality
- Patients and Families as Advisors
- Patterns of Care
- Information/Education for Patients and Families
- Charting and Documentation
- Patient and Family Support
- Quality Improvement
- Personnel
- Environment and Design

As the hospital or health system makes changes and improvements within specific clinical areas and departments, staff can use this tool for conducting additional assessments at the unit, department, or service line level. Leaders of these areas, front-line staff, patients, and families should be involved in this endeavor.

Advancing the practice of patient- and family-centered care is not a program to be “rolled out.” It is a long-term journey and commitment that evolves with the changing needs and priorities of the organization and the individuals, families, and communities it serves. By completing this tool and discussing the issues it reveals, hospital and health system teams can take the first step in this important work.

Instructions

Step 1: Assemble Team

Successful culture change of a hospital, department, or clinical area requires the commitment and involvement of senior leadership. For this reason, it is recommended that senior leaders for the clinical area or department and other relevant hospital leaders participate on the team completing the initial assessment. Managers, front-line staff, patients, and families should also participate on this team. On the basis of its structure and human resources, each hospital will need to decide how best to configure this team.

Step 2: Complete Assessment Inventory

There are several different ways to complete this inventory. Some organizations find it helpful for each team member to complete the tool individually. Other organizations ask all team members to review the tool individually and then to meet as a group to discuss their ideas and formulate a group response. Participants should set aside several hours for completing the checklist.

The tool asks you to complete four tasks:

A. Rate the status of patient- and family-centered care.

Please circle the number within the *status* column that indicates how well you think your hospital, department, or clinical area is applying the concepts of patient- and family-centered care. This 5-point scale is not an attempt to obtain a precise numerical rating, but rather it is a way to develop understanding for where your hospital is along a continuum of implementing patient- and family-centered care.

B. Rank perceived priority for change or improvement.

Circle the number in the *perceived priority* column for what you believe should be the level of priority for change or improvement for each key indicator. This ranking will help prioritize change activities to undertake over time at your hospital.

C. Provide notes and examples.

The fourth column provides space to list *examples* of policies, programs, practices, or design features. This space can also be used for clarifying notes that correspond to the responses in the columns to the left. This information will be useful for future planning.

D. Complete open-ended responses.

The last page asks for *narrative responses* related to participants' experiences in implementing patient- and family-centered care, the benefits and outcomes of these changes, and challenges encountered. In addition, it asks participants to describe in writing any insights they have derived from completing the assessment inventory and to state whether or not they believe that patient- and family-centered care should be an organizational priority.

**Step 3:
Reflect on
Findings**

Plan time to review findings and discuss them within the context of the organization's strategic priorities and quality and safety agendas.

**Step 4:
Develop Action
Plan**

After completing the assessment, the organization should develop an action plan to analyze the results and begin to address the priorities identified. The plan should include both short- and long-term goals. Many hospitals and health systems have found it useful to appoint a steering committee for patient- and family-centered care to oversee and coordinate the change process, encourage collaborative initiatives, and ensure that these efforts are integrated with their quality and safety agendas.

**Step 5:
Repeat
Assessment
Process**

After completing the initial assessment, specific clinical areas and departments should repeat the assessment process annually and use the inventory to advance the practice of patient- and family-centered care within their areas of responsibility. In addition, the senior leadership team for the organization should repeat the assessment process every 18 months to two years for the overall hospital or health system.

Key Indicators	Status Not at all OK Very Well	Perceived Priority for Change/ Improvement Low High	Notes Examples/Clarification of Response
Leadership			
Leaders of the organization (governing board, administration, and clinical staff leadership) are knowledgeable about patient- and family-centered care.	1 2 3 4 5	1 2 3	
Leaders of the organization, through words and actions, consistently convey that the patient's and family's experience of care matters, that it is important to quality, safety, and the best outcomes.	1 2 3 4 5	1 2 3	
Leaders of the organization, through words and actions, encourage and support staff and physicians in the practice of patient- and family-centered care.	1 2 3 4 5	1 2 3	
<p>Leaders of the organization, through words and actions, encourage and support patient and family collaboration at all levels of care:</p> <ul style="list-style-type: none"> • In clinical care of the individual patient. • In planning, implementing, and evaluating hospital policies and programs. • In strategic planning and facility planning. 	1 2 3 4 5	1 2 3	
Leaders of the organization integrate patient- and family-centered concepts and strategies in the agendas for quality and safety.	1 2 3 4 5	1 2 3	

Key Indicators	Status					Perceived Priority for Change/Improvement			Notes Examples/Clarification of Response
	Not at all	OK	Very Well			Low	High		
Mission and Definition of Quality									
The mission statement articulates a commitment to the concepts of patient- and family-centered care.	1	2	3	4	5	1	2	3	
The organization has defined quality health care and this definition includes how patients and families will experience care.	1	2	3	4	5	1	2	3	
The organization has defined how patient care will be provided and what is expected relative to the experience of care (e.g., a philosophy of care statement).	1	2	3	4	5	1	2	3	
The definition for how care will be delivered reflects the principles of patient- and family-centered care and articulates:									
• The importance of conveying respect and preserving the dignity of each patient and family.	1	2	3	4	5	1	2	3	
• Acknowledgement of the individuality, culture, capacity, and abilities of each patient and family.	1	2	3	4	5	1	2	3	
• A broad definition of family.	1	2	3	4	5	1	2	3	
• The importance of families to the care and comfort of patients.	1	2	3	4	5	1	2	3	
• The importance of collaborating with patients and families at all levels of care.	1	2	3	4	5	1	2	3	
Patients and families were involved in defining quality and developing the mission and philosophy of care statements.	1	2	3	4	5	1	2	3	

Key Indicators	Status Not at all OK Very Well	Perceived Priority for Change/ Improvement Low High	Notes Examples/Clarification of Response
Mission and Definition of Quality (cont.)			
<p>The concepts of the philosophy of care are shared with patients and families in a variety of ways including:</p> <ul style="list-style-type: none"> • Patient and family handbook • Admission/outpatient care materials. • Hospital/clinic Web site. 	<p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p>	<p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p>	
<p>The philosophy of care is taught as part of:</p> <ul style="list-style-type: none"> • Orientation for new employees. • Orientation for students and trainees. • Continuing education programs for: <ul style="list-style-type: none"> – Employees. – Medical staff. – Trustees. 	<p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p>	<p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p>	

Key Indicators	Status					Perceived Priority for Change/Improvement			Notes Examples/Clarification of Response

Patients and Families as Advisors (cont.)			
Patients and families are involved in teaching students and trainees.	1 2 3 4 5	1 2 3	
There is a paid position(s) for a patient or family leader to facilitate the development of patient- and family-centered initiatives.	1 2 3 4 5	1 2 3	
There is a staff liaison assigned to patient and family collaborative endeavors.	1 2 3 4 5	1 2 3	

Key Indicators	Status Not at all OK Very Well	Perceived Priority for Change/ Improvement Low High	Notes Examples/Clarification of Response
Patterns of Care			
Family members are not viewed as visitors; they are always welcome to be with the patient, in accordance with patient preference.	1 2 3 4 5	1 2 3	
Families can remain with the patient during nurse change of shift, in accordance with patient preference.	1 2 3 4 5	1 2 3	
<p>During rounds, in accordance with patient preference, families can:</p> <ul style="list-style-type: none"> • Remain with the patient. • Participate in rounds. 	<p>1 2 3 4 5</p> <p>1 2 3 4 5</p>	<p>1 2 3</p> <p>1 2 3</p>	
<p>Families' choices, in accordance with patient preference, about whether or not to remain with the patient are respected and supported by staff during such situations as:</p> <ul style="list-style-type: none"> • Clinic visit/examination. • Therapy/treatment. • Painful/invasive procedures. • Resuscitation. 	<p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p> <p>1 2 3 4 5</p>	<p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p> <p>1 2 3</p>	

Key Indicators	Status	Perceived Priority for Change/Improvement	Notes
	Not at all OK Very Well	Low High	Examples/Clarification of Response
Patterns of Care (cont.)			
Families' choices, in accordance with patient preference, about whether or not to remain with the patient are respected and supported by staff in clinical areas such as:			
• Radiology.	1 2 3 4 5	1 2 3	
• Surgical holding area	1 2 3 4 5	1 2 3	
• Anesthesia induction.	1 2 3 4 5	1 2 3	
• Recovery room.	1 2 3 4 5	1 2 3	
• Emergency room.	1 2 3 4 5	1 2 3	
• Other.	1 2 3 4 5	1 2 3	
Patients and families are viewed as integral members of the health care team.	1 2 3 4 5	1 2 3	
Patients and families have the opportunity to participate in interdisciplinary meetings to plan care.	1 2 3 4 5	1 2 3	
There are systems in place to encourage communication among patients, families, and staff (e.g. chart, email, bulletin boards in patient's room, pagers, telephone contact).	1 2 3 4 5	1 2 3	
There is open disclosure, both in written policy and actual practice by staff, with the patient and family regarding all errors, whether or not adverse events occur.	1 2 3 4 5	1 2 3	

Key Indicators	Status					Perceived Priority for Change/Improvement			Notes Examples/Clarification of Response
	Not at all	OK	Very Well			Low	High		
Patterns of Care (cont.)									
Staff ask patients and families about their observations, goals, and priorities for the patient in:									
• Outpatient settings.	1	2	3	4	5	1	2	3	
• Inpatient settings.	1	2	3	4	5	1	2	3	
Staff acknowledge strengths in all patients and families.	1	2	3	4	5	1	2	3	
Staff collaborate with the patient and family to manage pain.	1	2	3	4	5	1	2	3	
Care is coordinated with patients and families and across disciplines and departments.	1	2	3	4	5	1	2	3	
Each patient has a single, identified coordinator of care.	1	2	3	4	5	1	2	3	
Patients and families have help with transitions in care (e.g. unit to unit, hospital to other facility, hospital to home, and between outpatient and inpatient).	1	2	3	4	5	1	2	3	
Patients and families are encouraged to participate in discharge planning from the beginning of hospitalization.	1	2	3	4	5	1	2	3	
Patients and families are asked about learning needs and priorities regarding care after discharge.	1	2	3	4	5	1	2	3	
Opportunities to learn and practice caregiving are provided to patients and families prior to discharge.	1	2	3	4	5	1	2	3	

Key Indicators	Status	Perceived Priority for Change/Improvement	Notes
	Not at all OK Very Well	Low High	Examples/Clarification of Response
Information/Education for Patients and Families			
There is continual, open, and honest communication among patients, families, and staff.	1 2 3 4 5	1 2 3	
Patients and families have telephone/email access to clinicians.	1 2 3 4 5	1 2 3	
Policies and practices encourage patient and family involvement in decision-making regarding their health care.	1 2 3 4 5	1 2 3	
Individualized and understandable follow-up instructions are provided to patients from:			
• Inpatient areas.	1 2 3 4 5	1 2 3	
• Outpatient areas.	1 2 3 4 5	1 2 3	
• Emergency Department.	1 2 3 4 5	1 2 3	
Written information is provided in primary languages of patients and families served by the hospital.	1 2 3 4 5	1 2 3	
Trained interpreters are available.	1 2 3 4 5	1 2 3	
A range of informational and educational programs and materials are available to patients and families.	1 2 3 4 5	1 2 3	
The hospital's information and educational materials reinforce the belief that patients and families are essential members of the health care team.	1 2 3 4 5	1 2 3	

Key Indicators	Status Not at all OK Very Well	Perceived Priority for Change/ Improvement Low High	Notes Examples/Clarification of Response
Information/Education for Patients and Families (cont.) There is a patient and family resource center accessible to patients, families, and staff with: <ul style="list-style-type: none"> • Useful programs and materials. • Useful written and audiovisual materials. • Internet access. • Useful bookmarked Web sites. • Skills training lab. 	1 2 3 4 5 1 2 3 4 5 1 2 3 4 5 1 2 3 4 5 1 2 3 4 5	1 2 3 1 2 3 1 2 3 1 2 3 1 2 3

Environment and Design									
The following create positive, welcoming first impressions for patients and families:									
• Parking lot.	1	2	3	4	5	1	2	3	
• Main entrance and lobby.	1	2	3	4	5	1	2	3	
• Reception area and information desk.	1	2	3	4	5	1	2	3	
• Entrance to specific units and clinics.	1	2	3	4	5	1	2	3	
• Entrance to Emergency Department.	1	2	3	4	5	1	2	3	
The hospital's/clinic's architecture and interior design use such features as lighting, color, aroma, views of nature, art, scale, proportion, sound, and texture to create a healing, supportive environment.	1	2	3	4	5	1	2	3	
Signage is welcoming and helpful to patients and families.	1	2	3	4	5	1	2	3	
Signage is in the languages of the communities served.	1	2	3	4	5	1	2	3	
There is the option of a private room for each patient.	1	2	3	4	5	1	2	3	
There is comfortable sleep space for a family member in the patient's room.	1	2	3	4	5	1	2	3	
Outpatient examination/treatment rooms ensure privacy for each patient.	1	2	3	4	5	1	2	3	

Key Indicators	Status Not at all OK Very Well	Perceived Priority for Change/ Improvement Low High	Notes Examples/Clarification of Response
Environment and Design (cont.)			
Outpatient examination/ treatment rooms allow for family presence and participation, according to the patient's preference.	1 2 3 4 5	1 2 3	
There are supportive spaces such as: <ul style="list-style-type: none"> • A private consultation room. • A family lounge. • Kitchen facilities/access to nutritious snacks. • Laundry facilities. • A place for prayer or quiet reflection. 	1 2 3 4 5	1 2 3	
There is space away from the bedside/exam room that supports family learning and practice of new caregiving skills.	1 2 3 4 5	1 2 3	
Space is designed to support staff in working efficiently and collaboratively with patients and families and with staff across disciplines and departments.	1 2 3 4 5	1 2 3	

Open-Ended Responses

Briefly describe innovative initiatives, programs, or products from your hospital or clinical area that reflect patient- and family-centered care and family/professional collaboration.

List the benefits/outcomes evolving from these innovations.

Briefly describe challenges or difficulties that you, your hospital, or your clinical area have experienced in advancing the practice of patient- and family-centered care.

Reflect on the findings of this assessment and their relevance and importance to your organization's strategic priorities and quality and safety agendas.
